

## ASSIGNMENT - Your Project Idea

Create a single [document](#) for your team on the team's GitHub repo Master Branch. Copy the following questions to it. The answers to these questions will provide a summary describing your group's idea for a project, why your group picked it, and how you picked it.

Assign each team member a few of the following questions to answer. Each team member should have at least two questions that they answer.

Make sure you make a commit note describing what you are adding or changing each time you commit to the document.

### Questions

1. What is your project idea (as decided by your team and approved by your teacher)? ***Olympics***
2. What kind of web site is it (Community, Existing Industry, Startup)?  
***Community***
3. What problem does your project solve? ***To access information about the ongoing Olympics***
4. Is it a "vitamin" or a "painkiller"? Why?  
***Vitamin it does not solve a real problem just a want not a necessity.***
5. How does your project solve the problem? ***Familiarize users with various aspects of the Olympics and tour various venues and sports.***
6. Is your idea similar to another product? If so, how is your idea better/different (what is your "secret sauce" as described in the video)?

***Simplifying wanted Olympics info!***

7. Describe the likely users of your web site.  
***Athletes, fans, visitors, aspiring athletes.***
8. Is the idea simple as described in the How To Choose Business Ideas video? ***It is simple because the design team is familiar with Olympic aspects.***
9. Is your idea in a growing market or mature market (see video on Growing Markets)? ***A growing market***
10. How did you come up with this idea? Describe the process.  
***Brainstorming, discussion, survey***
11. What other ideas were candidates? ***Elder operating system for ease of computing (email, web surfing, etc)., Outdoor family activities for older children.***
12. Why did you pick this idea over the other candidates? ***Survey***

There is only one answer [document](#) per team - the one on your team's Master Branch of your GitHub repo.
